

# Emerging Perspectives on Salt Marsh Harvest Mouse Conservation and Management – Ducks, Dikes and Demographics

**Katherine Smith**

California Department of Fish  
and Wildlife  
UC Davis

# Salt Marsh Harvest Mouse

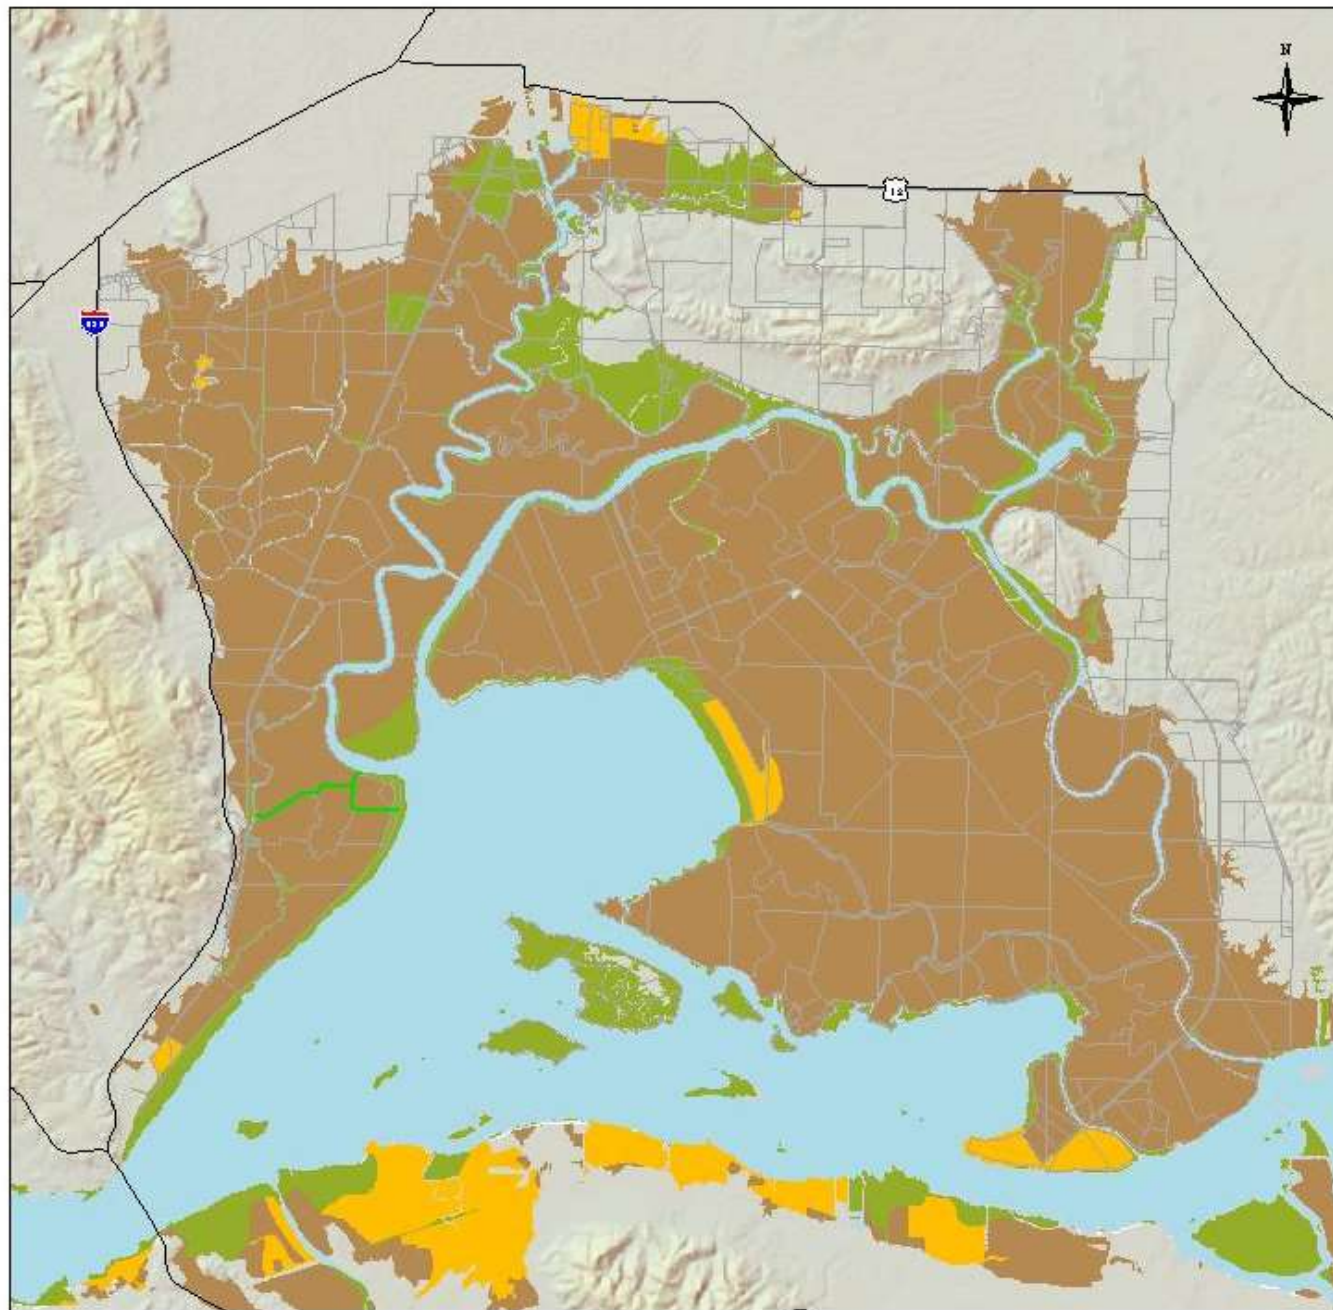

Endangered Species

–Federal: 1970

–State: 1971

Only Mammal Restricted To  
Habitat Loss  
Coastal Marshes

## Marsh Types of Suisun

- Tidal Marsh
- Muted Tidal Marsh
- Managed Marsh

How can we perform multispecies management that benefits both the endangered salt marsh harvest mouse and economically and culturally important waterfowl?

# How do we make this work?

What are the effects of  
waterfowl  
management?

VS.

What are the effects of  
tidal restoration?

What are the relative  
habitat values of  
managed and tidal  
wetlands?

# Unanswered Questions

When do they breed?

How many young can they have?

How long do they usually live?

What do they like to eat?

How many are there?

How large are home ranges?

What are activity patterns?

# How are we doing it?

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

- Demographics
- Habitat effects and values
- Populations
- Correlations with duck populations

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

Tidal Wetlands  
*No Management  
Activities*

Low Management  
Treatment  
*No Recent  
Management  
Activities*

High Management  
Treatment  
*Recently Disced*

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

- Trapping monthly/bimonthly
- Set traps at sunset, baited with bird seed and cotton
- Check traps at sunrise
- Measure and mark individuals

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

## House Mouse Captures

## Average House Mouse Captures

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

## Western Harvest Mouse Captures

Revisions

## Salt Marsh Harvest Mouse Captures

## Average Salt Marsh Harvest Mouse Captures

# Trapping

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

- Male Bias, reversed somewhat following draw down
- Surprising breeding habits
- Intriguing habitat use
- Diked wetlands supporting mice just days after discing
- Three dimensional habitat trapping challenges

# Tracking

What do we want to know?

Design Justification

Methods

Preliminary Results

Revisions

- Habitat use
- Activity patterns
- Responses to land management activities
  - Waterfowl management
  - Restoration (indirectly)

Managed Wetland

Upland Transition

Levee

Tidal Wetland

# Tracking

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Revisions

- Real time responses to changes in habitat
- Behavior patterns throughout the day
- Better understand microhabitat use

# Tracking

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

## – Quarterly

- October – Flood up
- February – Circulation
- April – Draw down
- July – Dry Work Season

## – Collar largest males and non-pregnant females

## – Triangulate and home in throughout the day

# Tracking

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

Tidal

Low

High

# Tracking

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

- Stereotypical movement patterns
- Striking variety
- High variation
- Vocalizations

# Diet Study

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Revisions

- What are preferred food types?
- Which food preferences overlap with waterfowl?
- How do preferences change over the year?

# Diet Study

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

- Can't measure actual diet choices
- Waterfowl managers actively promote growth of some vegetation types

Items

# Diet Study

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

## Fall Diet Preferences

Proportion of Individuals Preferring

■ Male ■ Female

# Diet Study

What do we want  
to know?

Design  
Justification

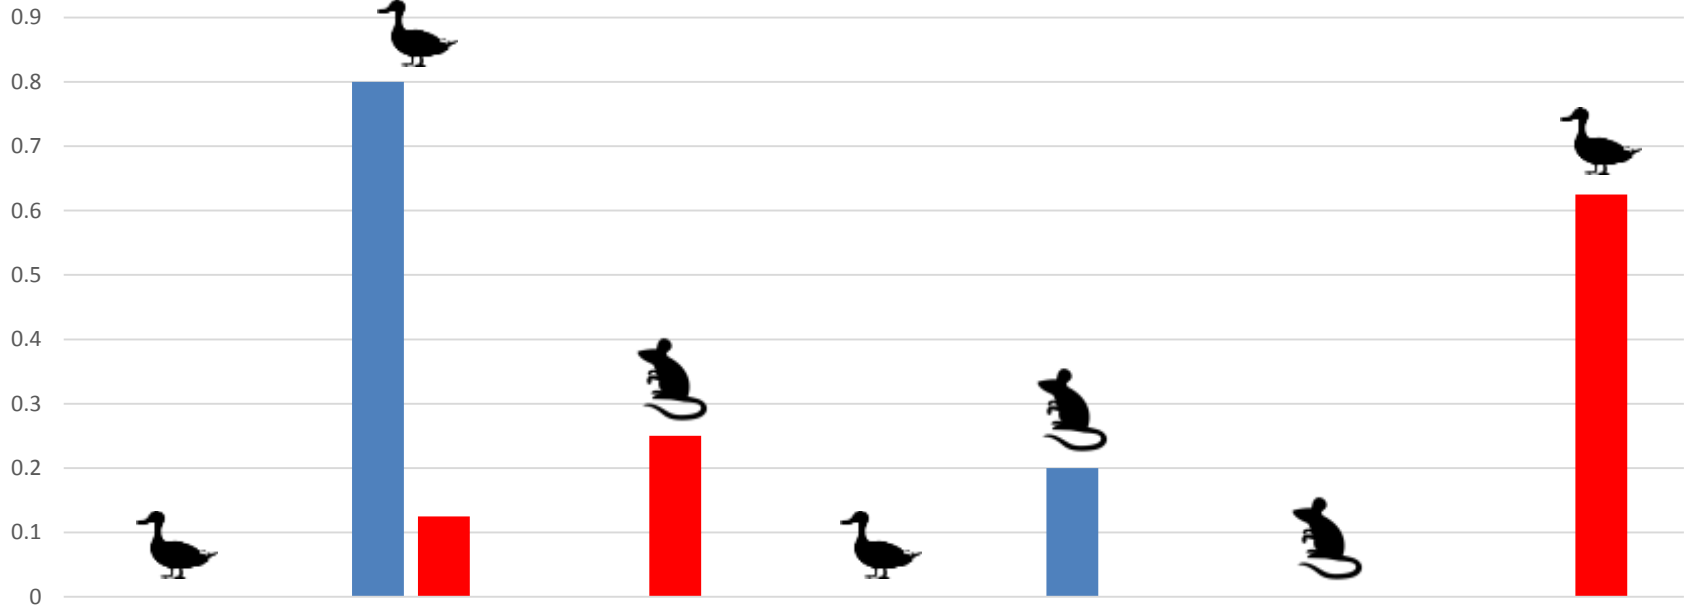

Methods

Preliminary  
Results

Ravi-lations

## Winter Diet Preferences

Proportion of Individuals Preferring

■ Male ■ Female

# Diet Study

What do we want  
to know?

Design  
Justification

Methods

Preliminary  
Results

Ravi-lations

- Invertebrate prey
  - Beetles/Earwig
  - Mealworms
  - Isopods
- Prefer same foods as ducks
- Don't choose foods we assume they would

# Can we make it work?

- Trapping Data
  - In some blocks more mice in diked wetlands
- Tracking Data
  - Management activities do not appear to affect behaviors
  - Smaller home ranges
- Diet Data
  - Large overlap in preference

How?

Ask me in three years!

# Achievements

- +800 Volunteer Hours, 50 Volunteers
- ~3,000 Capture Events
- +12,000 Trap Nights
- ~1,500 Individuals Marked
